

Plant Site Supervisor (m/f) worldwide

Company

As an international corporation in the field of chemical plants with headquarters in the north of Switzerland, we employ a workforce of around 80 employees worldwide. We owe our success to our competent staff with its expertise in process engineering, chemical engineering and project management. On a global level these people design, calculate, test and implement optimal solutions for various challenges in basic chemicals. The chemical plants are built to order by our suppliers. Years of experience in caustic soda evaporation and solidification have founded our leadership in this field.

Main Tasks

- ✓ As junior **Plant Site Supervisor** you will first receive an extensive and detailed training in the properties and requirements of our chemical plants. Based on received training and gained experiences with our technologies you will act as our representative at our customer's plant site, you will be in charge of supervising the erection work done by the customer's service provider. You will ensure the correctness of erection works and the compliance with our quality standard, our manufacturing guidelines and contractual agreements. You are responsible for the reporting of deviations and are in constant contact with the project manager of our company.
- ✓ It is your passion to be on plant sites worldwide (mainly South East Asia, Middle East). You like the diversity of the different cultures of our customers and are able to interact and communicate successfully and adequately with different cultures. You are interested and willing to learn new skills which might not be directly related to your profession.
- ✓ Mechanical profession (such as welder, pipe-fitter, mechanical, locksmith etc.)
- ✓ English: fluent (oral/writing)
Any other language welcome (German, French, Chinese, Arabic etc.)
- ✓ You have already some experience as erection supervisor in similar fields. You also are trained and/ or willing in taking over responsibility and to work as sole representative of our company on the plant sites. You have a structured, well organized working style. You are stress resistant and able to work in difficult environment conditions.
A proven record of experience in international sites will be an advantage.
